Christine Kump
Project Coordinator
Hazardous Waste Program
Missouri Department of Natural Resources
P.O. Box 176
Jefferson City, MO 65102-0176

Dear Ms. Kump:

This letter is being written in response to the Robert K. Morrison letter dated August 29, 2001 and is regarding the submittal of a work plan to address the perceived data gaps with respect to the groundwater contamination in the area.

Due to the large expansion of the soil remediation project, the discovery of additional information on the past solvent management practices at the facility and the further development of the Hulett Lagoon work plan, Modine requests that the MDNR required work plan be delayed for an additional 180 days from the date of this letter. The unexpected expansion of the scope of the soil remediation project has required Modine to devote more resources than anticipated to the project and to the evaluation of its proper completion. This time period will allow Modine to, at this time, focus its resources on fully evaluating the overall scope and clean up options for the expanded soil remediation project and confirm the accuracy of the additional information that has been discovered. The additional time will also help to further coordinate activities between all interested parties so that the need for and location of additional groundwater monitoring wells can be better evaluated in light of the further development of the Hulett lagoon workplan and the information gathered by the expanded soil remediation. If you have any questions, please contact me at (262) 636-1649 or at the letterhead address.

Sincerely,

Thomas S. Sanicola
Senior Environmental Engineer
